

***Technical Order***

***GROUND SERVICING OF AIRCRAFT and STATIC GROUNDING/BONDING***

---

T.O. 00-25-172, 1 Feb 87, is supplemented as follows:

3-4. MDS specific T.O.s take precedence for grounding procedures.

5-14. The authority to establish (in writing) a program for initial proficiency certification and annual proficiency recertification for rapid defueling of the aircraft listed in Table 5-1 of the basic T.O. is delegated to the LG. Automated Data Products may be used to schedule and record the initial certification and annual recertification.

5-16i. Shelter doors shall remain open during refueling operations.

5-17. ANG units tasked to use hardened aircraft shelters which do not meet the National Electrical Codes for Class I, Division 2 hazardous locations will comply with the applicable host command directives.

5-22h. ANG units will comply with host command directives.

6-4a.(19) Aircrew members may remain on board the ANG aircraft during concurrent servicing operations when authorized by the Gaining MAJCOM (GMAJCOM) concurrent servicing procedures.

6-11b. The method of identification is delegated to the LG.

6-13a.(3) The method of identification is delegated to the LG.

7-7. ANG units are not authorized to perform hot refueling unless specifically required to meet Design Operational Capability (DOC) requirements. Exceptions to this require ANG/LGMM approval. Units will use procedures outlined in ANGI 21-101 when authorized hot refueling.

7-8. ANG installations shall be certified by an ANG certification team at unit expense.

7-15d. GMAJCOM directives are followed when certification is required.

7-18. Hot aircraft to aircraft ground refueling of ANG aircraft will only be done when directed by the GMAJCOM during contingencies, emergencies, combat training exercises or other exceptional circumstances. The approved GMAJCOM directives and procedures will be followed. The Wing/Group commander of any ANG unit needing cold aircraft to aircraft ground refueling capability will develop a wing/group directive containing the specific procedures for this operation. The unit directive and the site certification report developed IAW paragraphs 7-8 and 7-18 of the basic T.O. and this supplement will be sent to ANG/LG and ANG/SE for coordination prior to implementing cold aircraft to aircraft ground refueling.

7-19. The authority to establish a program for initial training and annual refresher training/certification for personnel involved in wet wing defueling of the aircraft listed in Table 7-5 of the basic T.O. is delegated to the LG. ADP may be used to schedule and record the training and to document the certification.

7-22. ABFDS with ACE to aircraft ground refueling will only be done when directed by the GMAJCOM during contingencies, emergencies, combat training exercises or other exceptional circumstances. The approved GMAJCOM directives are followed.
